SURVEY COMPLETION DATE: 07-27-2021

Many years of research conducted by The Gallup Organization suggest that the most effective people are those who understand their strengths and behaviors. These people are best able to develop strategies to meet and exceed the demands of their daily lives, their careers, and their families.

A review of the knowledge and skills you have acquired can provide a basic sense of your abilities, but an awareness and understanding of your natural talents will provide true insight into the core reasons behind your consistent successes.

Your Signature Themes report presents your five most dominant themes of talent, in the rank order revealed by your responses to CliftonStrengths. Of the 34 themes measured, these are your "top five."

Your Signature Themes are very important in maximizing the talents that lead to your successes. By focusing on your Signature Themes, separately and in combination, you can identify your talents, build them into strengths, and enjoy personal and career success through consistent, near-perfect performance.

---

## Restorative

You love to solve problems. Whereas some are dismayed when they encounter yet another breakdown, you can be energized by it. You enjoy the challenge of analyzing the symptoms, identifying what is wrong, and finding the solution. You may prefer practical problems or conceptual ones or personal ones. You may seek out specific kinds of problems that you have met many times before and that you are confident you can fix. Or you may feel the greatest push when faced with complex and unfamiliar problems. Your exact preferences are determined by your other themes and experiences. But what is certain is that you enjoy bringing things back to life. It is a wonderful feeling to identify the undermining factor(s), eradicate them, and restore something to its true glory. Intuitively, you know that without your intervention, this thing—this machine, this technique, this person, this company—might have ceased to function. You fixed it, resuscitated it, rekindled its vitality. Phrasing it the way you might, you saved it.

---

## Individualization

Your Individualization theme leads you to be intrigued by the unique qualities of each person. You are impatient with generalizations or "types" because you don't want to obscure what is special and

distinct about each person. Instead, you focus on the differences between individuals. You instinctively observe each person's style, each person's motivation, how each thinks, and how each builds relationships. You hear the one-of-a-kind stories in each person's life. This theme explains why you pick your friends just the right birthday gift, why you know that one person prefers praise in public and another detests it, and why you tailor your teaching style to accommodate one person's need to be shown and another's desire to "figure it out as I go." Because you are such a keen observer of other people's strengths, you can draw out the best in each person. This Individualization theme also helps you build productive teams. While some search around for the perfect team "structure" or "process," you know instinctively that the secret to great teams is casting by individual strengths so that everyone can do a lot of what they do well.

---

## Learner

You love to learn. The subject matter that interests you most will be determined by your other themes and experiences, but whatever the subject, you will always be drawn to the process of learning. The process, more than the content or the result, is especially exciting for you. You are energized by the steady and deliberate journey from ignorance to competence. The thrill of the first few facts, the early efforts to recite or practice what you have learned, the growing confidence of a skill mastered—this is the process that entices you. Your excitement leads you to engage in adult learning experiences—yoga or piano lessons or graduate classes. It enables you to thrive in dynamic work environments where you are asked to take on short project assignments and are expected to learn a lot about the new subject matter in a short period of time and then move on to the next one. This Learner theme does not necessarily mean that you seek to become the subject matter expert, or that you are striving for the respect that accompanies a professional or academic credential. The outcome of the learning is less significant than the "getting there."

---

## Input

You are inquisitive. You collect things. You might collect information—words, facts, books, and quotations—or you might collect tangible objects such as butterflies, baseball cards, porcelain dolls, or sepia photographs. Whatever you collect, you collect it because it interests you. And yours is the kind of mind that finds so many things interesting. The world is exciting precisely because of its infinite variety and complexity. If you read a great deal, it is not necessarily to refine your theories but, rather, to add more information to your archives. If you like to travel, it is because each new location offers novel artifacts and facts. These can be acquired and then stored away. Why are they worth storing? At the time of storing it is often hard to say exactly when or why you might need them, but who knows when they might become useful? With all those possible uses in mind, you really don't feel comfortable throwing anything away. So you keep acquiring and compiling and filing stuff away. It's interesting. It keeps your mind fresh. And perhaps one day some of it will prove valuable.

---

## Analytical

Your Analytical theme challenges other people: “Prove it. Show me why what you are claiming is true.” In the face of this kind of questioning some will find that their brilliant theories wither and die. For you, this is precisely the point. You do not necessarily want to destroy other people’s ideas, but you do insist that their theories be sound. You see yourself as objective and dispassionate. You like data because they are value free. They have no agenda. Armed with these data, you search for patterns and connections. You want to understand how certain patterns affect one another. How do they combine? What is their outcome? Does this outcome fit with the theory being offered or the situation being confronted? These are your questions. You peel the layers back until, gradually, the root cause or causes are revealed. Others see you as logical and rigorous. Over time they will come to you in order to expose someone’s “wishful thinking” or “clumsy thinking” to your refining mind. It is hoped that your analysis is never delivered too harshly. Otherwise, others may avoid you when that “wishful thinking” is their own.
